

| Picture                       | Picture Features  |   |
|-------------------------------|---|---|
| Screen Size                   | Measured diagonally in inches   | 32  |
| HD Ready                      | Is it ready to receive High Definition signals?   |    |
| 1080p Full HD Ready           | Is it ready to receive 1080p, Full High Definition signals?   |    |
| Pixel Resolution              | Pixel resolution - Horizontal x vertical  | 1366 x 768  |
| Contrast Ratio                | Contrast ratio - from manufacturers information   | 70,000:1  |
| Brightness                    | Brightness of screen (cd/m squared with Plasma and LCD, ANSI for projectors)  | 350   |
| Response Time                 | Time taken for screen to respond in milliseconds.   | NA  |
| 100Hz/200Hz Scanning          | Does the TV have 200Hz or 100Hz scanning? These reduce flicker and offer a smoother picture. 200Hz is superior to 100Hz                           |    |
| LED Backlight                 | Does it have LED backlighting? This technology promotes enhanced contrast ratios and thinner sets.  |    |
| 3D TV                         | Does it offer 3D viewing? Remember that glasses are not always included.  |    |
| 2D/3D Conversion              | Does it feature 2D to 3D upconversion? This lets you watch 2D material in 3D.   |    |
| Number of 3D Glasses Included | The number of 3D glasses included with the sale of this unit. The glasses may be in the box, via separate redemption or offered at point of sale. | NA  |
| Analogue Tuner                | Does it receive conventional, analogue TV stations?   |    |
| Freeview                      | Does it receive Freeview TV stations?   |   |
| Freeview HD                   | Does it receive Freeview HD TV stations?  |  |
| freesat HD                    | Does it receive freesat HD TV stations?   |  |
| Sound                         | Sound Features  |   |
| Analogue Audio Output         | Does it have a dedicated analogue audio output? This lets you connect the TV's sound to a hi-fi system.   |  |
| Digital Audio Output          | Does it have a dedicated digital audio output? This lets you connect the TV's sound to an AV or digital hi-fi system.                             | Yes - Optical   |
| Speakers                      | Are stereo speakers standard?   |  |
| Connections                   | Connection Features   |   |
| HDMI                          | Number of HDMI sockets.   | 2   |
| USB                           | Number of USB sockets   | 1   |

|                                |  |                  |
|--------------------------------|--|------------------|
| USB Video Playback             | Does it have USB video playback? As standard, USB sockets except photo and music files. Enhanced spec sockets also accept video files.   |                  |
| USB Recording                  | Does it have USB recording? As standard, USB sockets playback files. Some will also record, for example, TV programs from a TV to hard drive.  |                  |
| Scart Sockets                  | Number of Scart sockets included   | 1                |
| Component                      | Is a component input fitted? Highest quality analogue input which can facilitate Progressive Scan where fitted.  |                  |
| PC Input                       | Can a computer be plugged in?  |                  |
| DVI                            | Does it have a DVI input? Digital interface that carries picture only  |                  |
| Headphone Socket               | Does it have a headphone socket? This allows you to connect headphones for private listening.  |                  |
| <b>Networking</b>              | Networking Features  | -                |
| DLNA Compliant                 | DLNA stands for Digital Living Network Alliance. It is an alliance of interested bodies that help standardise streaming content. If a product is DLNA complaint you can be assured it will stream music, photos or video from your PC, laptop to TV or other device. |                  |
| Wireless Connection            | Whether a wireless or, Wi-Fi, connection is included as standard or optional (via dongle). This allows for wireless connection to your home network hub.   |                  |
| Web Applications               | Access to web applications or apps such as YouTube.  |                  |
| BBC iPlayer                    | Whether or not the unit has access to one of the most popular web apps - BBC iPlayer.  |                  |
| Full Web Browser               | Whether or not the unit gives the option of a full web browser. Note that in some instances not all web content can be shown - such as Flash.  |                  |
| <b>Green Credentials</b>       | Eco Friendly Features  | -                |
| <b>Eco Friendly</b>            | Does this product conform to energy efficient standards? These standards include the American "Energy Star", the European "Energy Flower" or "EcoLabel" and the UK EST (Energy Saving Trust) certification.  |                  |
| Power Consumption - Standby    | This is the power used in watts when the unit is switched off but still powered at the mains and ready to be turned back on.   | NA               |
| Power Consumption - Normal Use | This is the power used in watts when the TV is on, using standard picture settings and modest volume levels. Note, different manufacturers use different methods to arrive at this figure. In some cases only the maximum power consumption is quoted.               | 111              |
| <b>General</b>                 | General Features   | -                |
| Remote Control                 | Is an Infra-red remote included?   |                  |
| Stand                          | Is a desktop stand standard?   |                  |
| Wall Mount Required            | Type of wall mount required. VESA fittings are usually 100 x 100mm, 200 x 100mm or   | VESA - 200 x 100 |

|                            |   |                 |
|----------------------------|---|-----------------|
|                            | 200 x 200mm. "Plasma type" is common with the larger LCD TV's and require a sliding bar type fitting. |                 |
| Dimensions excluding stand | Dimensions of set excluding any stand, bracket or detachable speakers (W x H x D) in mm               | 800 x 509 x 74  |
| Dimensions including stand | Dimensions of set including stand (W x H x D) in mm   | 800 x 565 x 207 |
| Weight                     | Approx weight without/with stand in KG.   | 8.2/9.2         |
